

Craft Idea 1: the Pen Jar Craft Project using Flower Clipart.

Get started! A perfect indoor craft projects for rainy days!

This is what you will need for this craft project:

A pair of scissors

Tape (transparent)

Glue

Paper of different colours

A Clipart set. (I have used the Flower Clipart set available from this website, but of course you may use other types of clipart or stickers.

You also need an old glass jar, for example an used jam jar or similar. Make sure it is clean and remove the label. This is easily done if you let the jar sink in hot water an hour or over the night. Carefully remove the label without making any marks on the glass.

Carefully cut out the clipart kittens from the paper. Cut two pieces from the coloured paper. The first one will serve as a label. Make sure the clipart kittens fit on the label. To decorate the border you can use a pair of decoration scissors, but this is not necessary. Instead cut a pattern with the scissors. For the second piece of paper, make a long piece with one side cut with a decorative pattern. This piece should be a couple of centimetres longer than the perimeter of the jar.

Glue the kittens on top of the label and write the text on the smaller label neatly. If you like you may choose to laminate the paper to protect it from humidity and wet hands. However, you may also put tape over all the labels when you attach them to the jar and protect them that way (which is easier, since the labels etc. will become stiffer if you laminate them).

Use tape and attach the longer piece of paper to the edge of the jar. This is easily done if you first attach one of the ends of the paper to the jar and then strap it tightly around and attach the other end. Remove spare paper by cutting it neatly.

Now place the smaller label above the bigger label. Use the other clipart figures as decoration.

This is how the jar of pens looked before. (Rather boring, wouldn't you agree?)

And this is the nice result! Good luck and happy crafting!
