

Craft Idea Project: Make your own Cat Jigsaw Puzzle!

For this craft project you will need:

- 1) A pair of scissors,
- 2) Paper glue (toxic free)
- 3) An old cardboard box (not too thick, Kellogg's boxes are perfect.)
- 4) A printed picture with a kitten and thin outlines for where to cut out the jigsaw puzzle pieces (you can download it here, or you can make it by yourself). It is best if the picture is printed with a laser printer, and not an ink printer, since the puzzle easily can get destroyed by water if it is printed with ink...

Carefully spread the paper glue evenly on the paper with the picture.

Then flip it and carefully place it on top of a piece of the cardboard box.
Make sure to remove all air bubbles before you...

...Put something heavy (for example the yellow pages) on top on the puzzle. Now wait for about 30 minutes, and then check if the glue is dry. In not wait another 30 minutes or until the paper glue has dried.

Here is a critical stage in the crafting: Carefully (and I mean really carefully) cut out the pieces from the outline. The neater the better. You may have to use some more glue on some of the pieces if the glue wasn't spread on evenly.

All the twelve pieces are cut out!

And the Cat jigsaw puzzle is finished! Fantastic!
